Soldiers Fire at Crowd of Disorderly Peasants, Who Attacked Patrol.

(By Associated Press.)
TIFLIS. March 30.—Alarming conditions are reported officially to exist in the Gori district, trans-Caucasus, where the losses sustained by landed proprietors, through peasant attacks and strikes. have been enormous. The postal servic

has ceased and documents in the public offices have been destroyed, thus preventing the drawing up of lists for military service. More Cossacks have been sent into the district to assist in quelling disturbances.

On March 27th thousands of peasants marched through the town of Gori, carrying red flags, and destroyed a number of shops. The crowd also attacked a military patrol, whereupon the soldlers fired a volley, wounding ten of the peasants, one of whom has since/died.

# HOLDING COTTON AND REDUCING ACREAGE

Governors Make Reports of Work in Several Southern States.

RALTIMORE, AD., ARTER M., Deep and Retive interest in the campaign for a re-duction; of the acreage in cotton this year, as shown by the authorities of Southern States, led the Manufacturers' Record this week to wire to Governors of the cotton States, asking for their opin-ion as to the extent of the reduction to be made. Governor Vardaman, of Musis-sippi, has entered upon a canvass of his State in the interest of reduction, making direct appeal to growers and others, and sippi, has entered upon a canvass of his State in the interest of reduction, making direct appeal to growers and others, and Governor Banchard, of Louisiana, has issued an official call, urging the growers well as the interests of the entire South, by planting a largely decreased area in cotton than that planted in 1294, and the bankers, merchants and others to exert their influence in behalf of such reduction. Such actions by State authorities, together with the vigor with which other prominent men throughout the South are pressing the campaign, reinforce the impressions favorable to reduction given in the letters published by the Manufacturers' Record about a month ago from heary a thousand Southern bankers, telling of plans in their respective communities for a certailment of the acreage. Telegrams received from some of the Governors will tend to strengthen the compaign. They are as follows:

Covernor James K. Vardamun, of Mississippi: "Your reguest for a report on the question of the reauction of cotton acreage in Mississippi has been received. I am now inaking a protty thorough canvass of the State, but I am not as well prepared to answer your question as I shall be a little later. However, \* am sure I am within the limits of conservatism when I say that in Mississipp the cotton acreage will be reduced not less than twenty per cent. I believe it will go to twenty-live per cent. I believe it will go to twenty-live per cent. I feelieve it will go to twenty-live per cent. I feelieve it will go to twenty-live per cent. I feelieve it will go to twenty-live per cent. I feelieve it will go to twenty-live per cent. The farmers are greatly interested in this matter, and the work of campaigning has hardy begun."

Governor N. B. Broward, of Florida: 'I know of no reduction contemplated by our farmers."

Governor & M. Terrell, of Georgia; 'At least seventy-five per cent. The cutton givers will make only a nominal reduction. A reduction of twenty per cent, of the growers will make only a nominal reduction. A reduction

a nominal reduction. A reduction of twenty per cent is a conservative estimate. Governor S. W. T. Lenham, of Texas; Governor S. W. T. Lenham, of Texas; To is impossible to unswer with any certainty. Excessive rains have affected the sowing of sprine outs. Corn planting has been delayed for the same reason, and it is not likely that the usual acreage will be used for corn. In consequence it is not probable that the cotton acreage will be materially reduced."

Governor D. C. Heyward, of South Cardina; "Answering your telegram of inquiry, I do not feel warranted at this time in making a forceast as to the reduction of the cotton acreage in South Cardina; "Answering duties have pevented my in ring the opportunity to observe the conditions of the fields, and consequently such a forceast would be merely a matter of personal opinion. I should think that the officers of the South Cardina frowers Association, who have tingeled mer the State would be in a better pacific to to formist the desired forces. These officers report that farmers are making the reduction as pledged by them, I am in accrety sympathy with the Cotton of Growers Association and the importion of the decay and the importion of the property of the south for the property of the south for the state would be in a better pacific to the south of the state would be in a better pacific to the south of the sout

tant movement that has been inaugurated looking to the reduction of the acreage and an increase of the price of cotton. I do not hesitate to express my belief that South Carolina's acreage in cotton will be reduced. I also believe that this movement has done much to encourage our farmers in undertaking diversified agriculture."

Few Japanese batteries which have pushed for forward occasionally drop philmose shells in suspected places. Yesterday there was a smart brush where General Mistchenko is stationed, the Japanese pressing forward in a determined endeavor to make a thorough reconaissance and learn the dispositions in this quarter. The Russians repelled the advance without uncovering their positions. There were insignificant losses. Aside from these recommissances acfairs are generally quiet on the southern positions. Late fishting has shown the admirable nature of Japanese methods of gathering information. Every infantry detachment, when moving to attack or occupying a new position, carried a reci of slender telephone wire, previously connected with a battery in the support, and the effects of fire and the movement of troops are speedly communicated from the most advanced lines. troops are speedly communicated from the most advanced lines.

Rosebud Has More Than 200 Homesteaders Without Husbands

A special to the New York World from Bonesteel, South Dakota, says:

The largest percentage of handsome and entirely eligible unmarried young women boasted by any community is claimed by Gregory county, So. Dakota, That's because Gregory county is the Rosebud Reservation. Two hundred and thirty-one young women are among the honiesteaders. They represent nearly half the States in the Union. Each one has a quarter section of the best land in the State; and just now they are in peed of some masculine assistance.

The young women who drew their claims stood up to the contract better, on the average, than the men. They almost of all filed on the land they drew, an are now here to settle and proye up. But they must have hired men, or men on some other terms, to fleip farm their lands; and hence is the desirability of this community as a location for ablebedled young men, unmarried, of good character, and willing to go into life partnership with girls who can furnish farms.
